

## DIGI-NET TECHNOLOGIES PRODUCT FACT SHEET:

DigiChat is an established leader in the real-time messaging industry. Thousands of top companies depend on Digi-Net for their Internet messaging needs and the addition of DigiChat Enterprise AV/IM to the desktop can quickly build a persistent community. With DigiChat AV/IM, Web developers can easily utilize our fully brandable locally installable application (just like consumer focused IM products such as AIM™ or MSN Messenger™). DigiChat AV/IM is the complete solution for a company's messaging needs.

### PRODUCT FEATURES

---

- **Web-based and Application-style Instant Messaging Software** – Includes a powerful instant messenger application that allows users to chat, share files and maintain buddy lists and more.
- **Cross Platform Support (works on Windows, Mac OS/OS X, Linux, Solaris, etc.)** – DigiChat supports most operating systems/platforms, including but not limited to: Windows 9x/NT/2000/XP, Mac OS/OS X, UNIX/Linux, and Solaris.
- **Web-based IM works on all modern browser platforms** – Allows your site visitors to instant message one another directly through their Web browsers.
- **Crystal Clear Voice Chat (VoIP)** – VoIP technology gives individuals as well as companies the power to enjoy clear voice conversations at a fraction (if any) of the cost of conventional telephony.
- **Support for Video Chat (P2P)** – Video capabilities take interaction to the most personal level by capturing tone, inflection and expression.
- **Send Files and Exchange files easily** – Share text documents, PDFs, images, sounds and video.
- **Beautiful Ensemble GUI with fully Skinnable Interface (Branding Support)** – Allows administrators to develop and apply custom themes and skins to DigiChat to match site look and feel.
- **High-Performance Text Messaging Engine** – Trusted by Fortune 500 companies for their communications needs, DigiChat ensures guaranteed delivery of messages and support for TCP/IP and HTTP tunneling protocols.
- **Enhancements to Moderated Auditorium-Style Chat Event Support (Webcasts)** – Advancements have been made to ensure that webcasts and chat events go off flawlessly. Guests and celebrities will benefit from the most powerful moderated functionality available today.
- **Firewall and Proxy Friendly (HTTP Tunneling Support)** – DigiChat's HTTP tunneling ensures that all users have the same access and control.
- **Chat Transcript Logging (great for HIPAA and SEC reporting requirements)** – DigiChat provides for the ability to log chat sessions for future reference or reporting.
