FOR IMMEDIATE RELEASE**DIGI-NET RELEASES DIGICHAT AV V5.1**

Version 5.1 introduces flash-based audio and video for superior performance

ATLANTA, March 1, 2005 – Digi-Net Technologies, Inc., a community-building and e-commerce solutions industry pioneer, today announced an upgrade to its highly successful DigiChat AV solution. DigiChat AV v5.1 incorporates next-generation flash-based audio and video technologies, resulting in unrivaled AV conferencing quality.

“A large driver of DigiChat’s success has come from our ability to constantly research, test and develop new technologies that push our customers forward. Version 5.1, using Flash, represents one of those large leaps forward in technology that has a dramatic impact on product performance and the customer experience,” said Robert Parker, Digi-Net CEO & Founder. “The price/performance equation the industry has been accustomed to with AV conferencing has been drastically altered. This solution will put extremely high-quality AV conferencing in reach for a very broad audience.”

DigiChat AV v5.1 features include:

- Flash-based Video Chat (One-to-One, One-to-Zero – broadcast)
- Improved Audio Chat Quality and Performance
- Flash Components Require Zero Configuration
- Improved Instant Messaging Component
- Improved moderation features allow new event entrants to view chat history
- Enhanced commander allows closer integration with membership database
- Improved Firewall Support (Nat Traversal)
- Chatmaster allows administrators to push Web content to users
- Increased Stability

DigiChat AV v5.1 builds upon the success of prior versions. DigiChat is the market-share leader in chat software solutions. Its user friendly interface and rock-solid stability and compatibility have led to thousands of site licenses sold to date. DigiChat also maintains versions for all operating system platforms including Macintosh™, Windows™, Linux/UNIX™ and others.
